Optional equipments for steam boilers

- **24H EXEMPTION KIT**
Accessory kit for continuous operation without supervision for 24h
- **72H EXEMPTION KIT**
Accessory kit for continuous operation without supervision for 72h
- **KIT TDS**
Salinity control group
- **KIT BLOW DOWN**
Boiler bottom automatic drain group
- **KIT 2nd PUMP**
Kit second boiler water feeding pump
- **KIT EC (gas) / KIT EC (diesel fuel)**
Economizer kit internal to the smoke chamber
Efficiency increase
- **ECONOMIZER KIT FOR PREHEATING THE CIRCUIT EXTERNAL TO THE BOILER**
- **DOUBLE ECONOMIZER KIT (first and second stage)**
- **MODULATION KIT FOR FEEDING WATER**
with electric valve / pneumatic / with inverter for feeding pump
- **KIT SAMPLE COOLER**
Water samples cooling group
- **KIT DRY RUN PROTECTION**
Protection against dry operation of the water feeding pump
- **ANTI-FLOODING KIT**
Anti-flooding protection during cooling down / pressure drop
- **MODULATING ELECTRIC VALVE KIT ON STEAM SOCKET**
application in combination with electrical panel type IML)
- **U-fi kit** (in combination with IML electrical panel)
For connection of the thermal group to internet without laying network cables and without insert the system in the corporate network
- **EasyAccess 2.0 system**
