chiller to cool sueding roll

The sueding machine S330 is made up of one sueding roller which is contrasted to a roller covered with rubber.

This machine can suede woven, knit fabric and other materials as non wovens, denim, outdoor, swimwear, sportswear, lingerie, used also in home textile and automotive fields. as imitation leather and nonwoven fabric so as to obtain finished products of excellent quality.

Particular is the possibility to make sueded drawings on fabric; infact, this possibility is called PATTERN SUEDING, that is by means of a rubber roller that has been engraved with drawings which has to be reproduced on the fabric surface.
